

656545 Sizzix® Bigz™ Die - Flowers, 3-D

1. Die-cut 3-D Flowers from chosen material.

2. Starting at the outside of the Flower, wrap the end around a wood dowel like a toothpick or wooden skewer.

3. Keep the wood dowel pointed toward the center of the Flower as you roll, keeping the petals in a bunch. Do not let the bunch spiral up or down the dowel.

4. When you finish rolling the Flower, remove the stick and tighten or loosen the bundle to your liking. Finish the Flower by adding a glue dot or a drop of hot glue to the inside of the circular flap at the very center of the Flower. Close the flap against the bottom loops of the Flower.
